

Cas 1447824-16-9 Acetyl Hexapeptide-37 Peptide For Moisturizing / Anti-Age

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC
- Model Number: HBY-Acetyl Hexapeptide-37
- Minimum Order Quantity: 1-500g
- Price: Negotiable
- Packaging Details: 1-500g /plastic bottle
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000kg per month

Product Specification

- INCI Name: VAcetyl Hexapeptide-37peptide
- Cas No.: 1447824-16-9
- Acetic Acid Content: $\leq 15.0\%$
- Recommended Use Level: 100-1000PPM
- Storage: Keep In Dark And Cool Dry Place (-5 To 8°C)
- Appearance: White To Off-white Powder
- Odor: Slightly Characteristic Odor
- Theoretical MW: 525.56
- Purity (HPLC): $\geq 95.0\%$
- Applications: Anti-wrinkle
- Highlight: Anti Age Acetyl Hexapeptide-37,
Cosmetic Peptide Cas 1447824-16-9,
Moisturizing Acetyl Hexapeptide-37

Product Description

Cas 1447824-16-9 Acetyl Hexapeptide-37 Peptide For Moisturizing / Anti-Age

Basic Information of Acetyl Hexapeptide-37 Peptide

INCI Name	Acetyl Hexapeptide-30
Cas No.	1447824-16-9
Recommended use level	100-1000PPM
Appearance	White to off-white powder
Purity (HPLC)	≥95.0%
Applications	Moisturizing / Anti-Age
MOQ	1g
Storage	-5 to 8°C

What is Acetyl Hexapeptide-37 Peptide For Moisturizing / Anti-Age?

Acetyl Hexapeptide-37 is a synthetic peptide that is used in skincare products to improve skin hydration and reduce the appearance of wrinkles and fine lines. It works by increasing the production of aquaporins, which are proteins that help to transport water across cell membranes. This helps to keep the skin hydrated and plump, which can reduce the appearance of wrinkles and fine lines.

Acetyl Hexapeptide-37 is also thought to help stimulate collagen production. Collagen is a protein that helps to keep the skin firm and youthful. By increasing collagen production, Acetyl Hexapeptide-37 can help to reduce the appearance of wrinkles and fine lines and improve the overall texture of the skin.

Acetyl Hexapeptide-37 is generally considered to be safe for most skin types, but it is important to do a patch test on a small area of skin before using any new product, especially if you have sensitive skin.

Acetyl Hexapeptide-37 can be found in a variety of skincare products, including serums, moisturizers, and eye creams. It is often used in combination with other anti-aging ingredients, such as retinol, hyaluronic acid, and vitamin C.

How does Acetyl Hexapeptide-37 Peptide For Moisturizing / Anti-Age work?

Acetyl Hexapeptide-37 is a synthetic peptide that is used in skincare products to improve skin hydration and reduce the appearance of wrinkles and fine lines. It works by increasing the production of aquaporins, which are proteins that help to transport water across cell membranes. This helps to keep the skin hydrated and plump, which can reduce the appearance of wrinkles and fine lines.

Acetyl Hexapeptide-37 is also thought to help stimulate collagen production. Collagen is a protein that helps to keep the skin firm and youthful. By increasing collagen production, Acetyl Hexapeptide-37 can help to reduce the appearance of wrinkles and fine lines and improve the overall texture of the skin.

Here is a more detailed explanation of how Acetyl Hexapeptide-37 works for moisturizing and anti-aging:

Moisturizing: Acetyl Hexapeptide-37 increases the production of aquaporins, which are proteins that help to transport water across cell membranes. This helps to keep the skin hydrated and plump, which can reduce the appearance of wrinkles and fine lines.

Anti-aging: Acetyl Hexapeptide-37 is also thought to help stimulate collagen production. Collagen is a protein that helps to keep the skin firm and youthful. By increasing collagen production, Acetyl Hexapeptide-37 can help to reduce the appearance of wrinkles and fine lines and improve the overall texture of the skin.

Applications of Acetyl Hexapeptide-37

Here are some specific applications of Acetyl Hexapeptide-37:

Anti-wrinkle cream: Acetyl Hexapeptide-37 is a common ingredient in anti-wrinkle creams, especially those targeting wrinkles around the eyes and mouth. It is thought to work by relaxing the muscles in the face, which can reduce the appearance of wrinkles and fine lines.

Anti-aging serum: Acetyl Hexapeptide-37 is also found in many anti-aging serums. These serums typically contain a blend of ingredients that work together to reduce the signs of aging, including Acetyl Hexapeptide-37, retinol, hyaluronic acid, and vitamin C.

Eye cream: Acetyl Hexapeptide-37 is a popular ingredient in eye creams, as it can help to reduce the appearance of crow's feet, fine lines, and dark circles around the eyes.

Moisturizer: Acetyl Hexapeptide-37 can also be found in some moisturizers. These moisturizers typically contain a blend of ingredients that work to hydrate and nourish the skin, while also reducing the signs of aging.

Acetyl Hexapeptide-37 is generally considered to be safe for most skin types, but it is important to do a patch test on a small area of skin before using any new product, especially if you have sensitive skin.

Here are some tips for using Acetyl Hexapeptide-37:

Apply it to clean, dry skin.

Use it twice daily, once in the morning and once at night.

Be patient. It may take several weeks to see noticeable results.

Use it in conjunction with other anti-aging ingredients, such as retinol, hyaluronic acid, and vitamin C, for best results.

If you are looking for an effective way to improve skin hydration and reduce the appearance of wrinkles and fine lines, Acetyl Hexapeptide-37 is a good ingredient to consider.
